

## 2020/21 Print Products

We believe the whole point of photography is to immortalise moments in print and these days there are so many different ways to do that.

Whether you want a good, old-fashioned picture on the wall or a thoughtful gift to send to someone, we have a range of options to choose from.

Our philosophy is to remain environmentally and socially aware, so sustainability and integrity will always be central to everything we do.

All prices are inclusive of VAT

If shipping is required, this will be calculated according to size and weight of the order.

## Standard Prints

Printed on professional, heavyweight paper with a lustre finish, our standard prints are an affordable way to present images from your wedding, photoshoot or start your art collection.

This paper provides excellent image quality on its stippled lustre surface and is ideal for framing.

Our mounted prints are presented in a hand cut, archival quality card mount with back and are ready to frame. The mount colour is off white unless otherwise stated.

Choose print only if you intend to use a professional framer or have a suitable frame and mount already.

## ENVIRONMENTAL INFORMATION

**Like most people these days, we recognise the importance of considering the environment not just in our homes, but also in the workplace.**

We have chosen UK based suppliers that use ethically sourced materials, have great recycling policies and hold FSC certificates where applicable.

The clear bags we use to protect our cards are plastic-free! They are made with corn/vegetable starch and are 100% compostable/biodegradable. The bags for prints are cellulose and recyclable.

### PACKAGING

Ensuring our products get to you in the best condition is our priority, but to help minimise costs, waste and environmental impact, we reuse and recycle wherever possible, including packaging. We hope you agree with us!

When our suppliers use new packing materials, they are made from recycled product, or recyclable where possible. Please continue this trend by either re-using or recycling our packaging.
